| CEO                | Alexander Stendel |
| Employees          | 50                |
| Revenues 2010/2011 | €5 million        |

## What do we do?

**Communication is our business, understanding our competence. Our mission is to communicate complex products and services in a way that is both simple and exciting. Because we have a firm grasp of content, we can develop the concepts our customers need for their markets. That means that we also tailor formats to their requirements, with an eye to technical precision and perfection – in everything we do.**

### For example, we create:

- Interactive media architectures for trade fairs, showrooms, exhibitions
- Websites, online specials, community portals, performance marketing
- Winning presentations for conference rooms and large events, in PowerPoint, Flash or as multimedia stage productions
- Moving images in the best format to suit the message; as green-screen productions, 3D movies, animated films or holographic shows
- Innovative tools for sales support: rate calculators, presentation kits - everything that saves time for sales reps and provides measurable support

**We make communication easy.**
